IEG PI NOTICE**No. 20-79****TITLE/SIGNIFICANCE:**

Soviet Artillery in RDT&D/New Weapons in Development-Early Deployment
Names listed below should be used in reporting, pending assignment of NATO approved designations.

COMMENT: Six towed and four self-propelled artillery weapons have been identified in Soviet RDT&E and production-related facilities. Two systems have been deployed to units. All weapons (including known, reference weapons) are drawn to a common-scale. All have been assigned interim NPIC designations for use in reporting. Observation of these or other new weapons should be reported to initiator (see below) for inclusion in the Object Target File and NPIC comprehensive RDT&E list. New weapons should not be named in initial reporting. Initial reports should include measurements of overall tube length (i.e. tube and breech), maximum width, and trail length (from carriage axle to end).
